of 28/11/2024

24TA00456

Messrs
E. MIROGLIO EAD
Industrial District - P.O. Box 360
8800 SLIVEN - BG

Tests to verify compliance with ZDHC parameters

Receiving date 25/10/2024

Receipt date 25/10/2024

Starting date of sampling 24/10/2024 **Starting time of sampling** 09.00

End date of sampling 24/10/2024 **End time of sampling** 14.00

Description Raw water

Identification Waste water_indirect discharge with pre-treatment

Customer E. MIROGLIO EAD

Sampling collected by Kolev Krasimir - ZDHC-A-23-E-C001068-R3366-1E695

Project number -

Type of sampling Composite(6 hours)

Sampling location Yambol Plant

Sampling procedure PG 22 rev.0

Time of conservation 5 days

Water flow rate -

Temperature at receivement 10°C

Test began on 29/10/2024 **Test ended on** 28/11/2024

Limit values

ZDHC - Wastewater Guidelines 2.1 2022

Tests

80234 Water and industrial wastewater. MRLS parameters in accordance with Tables 1A-1T ZDHC Wastewater Guidelines Version 2.2 2024

The tests indicated by the symbol "*" do not fall within the ACCREDIA accreditation scope of the laboratory.

If carried out by the laboratory, the sampling is conducted with a method not falling within the scope of accreditation ACCREDIA of the Laboratory.

The analytical results are not corrected by the laboratory for the recovery factor.

The measurement uncertainty indicated corresponds to the expanded uncertainty with coverage factor k = 2 at a level of probability p = 95%.

When preceded by the symbol "<", the result refers to the lower limit of quantification of the method.

The recoveries guaranteed by the laboratory for tests that require extraction from the matrix and / or reduction in volume of the extracts are between 80% and 120%.

If present, opinions and observations do not fall within the ACCREDIA accreditation.

If the sample is not taken by technicians of Centro Tessile Cotoniero e Abbigliamento S.p.A., the identification data inserted in the test report are provided by the customer under his own responsibility and the results can be found at sample as received.

Tests marked with the symbol "N" exceed the "Foundational limits" for ZDHC protocol

Notes

The tests indicated by the symbol "*" do not fall within the ACCREDIA accreditation scope of the laboratory.

If carried out by the laboratory, the sampling is conducted with a method not falling within the scope of accreditation ACCREDIA of the Laboratory.

The analytical results are not corrected by the laboratory for the recovery factor.

The measurement uncertainty indicated corresponds to the expanded uncertainty with coverage factor $k = 2$ at a level of probability $p = 95\%$.

When preceded by the symbol "<", the result refers to the lower limit of quantification of the method.

The recoveries guaranteed by the laboratory for tests that require extraction from the matrix and / or reduction in volume of the extracts are between 80% and 120%.

If present, opinions and observations do not fall within the ACCREDIA accreditation.

If the sample is not taken by technicians of Centro Tessile Cotoniero e Abbigliamento S.p.A., the identification data inserted in the test report are provided by the customer under his own responsibility and the results can be found at sample as received.

Tests marked with the symbol "N" exceed the "Foundational limits" for ZDHC protocol
